1 Introduction

1.1 Motivation

When writing a paper, it is not an easy task to keep the bibliography part correct and updated. This process is also very time-consuming. Through this repo, we provide a uniform access to the latest bibliography entries related to the research area of the author: *Stochastic Partial Differential Equations* (SPDEs) and related fields.

1.2 Sources

Here is a reference bank. The biblatex entries were mostly obtained from

https://mathscinet.ams.org/mathscinet

for the published mathematics papers and from the arXiv for the preprint. Some physics papers are obtained from

https://journals.aps.org/search/

For papers that do not originate from the aforementioned sources, we endeavor to retrieve the bibliography entry directly from the official journal website to ensure maximum accuracy of the records.

1.3 Naming convention

The naming convention consists of three cases:

1. Single authored paper, such as:

Einstein, Albert. Random PDE for special relativities. *Annals of Probability*, Volume, Number, 2023.

einstein:23:random

2. Paper with two authors, such as:

Einstein, Albert and Grothendieck, Alexandre. A stochastic PDE model for general relativities. *Electronic Journal of Probability*, Volume, Number, 2024.

einstein.grothendieck:24:stochastic

3. Paper with more than two authors, such as:

Einstein, Albert and Grothendieck, Alexandre and Newton, Isaac. A private communication on interemittency. *Transactions of AMS*, Volume, Number, 2025.

einstein.grothendieck.ea:25:private

Here is a demonstration how to use it in neovim:

https://asciinema.org/a/596819.

1.4 How to contribute

We strive for accuracy and comprehensiveness in this bibliography bank. If you encounter any errors, typos, or issues, or if you would like to suggest additional entries, we warmly welcome your input. Your contributions are invaluable to the enhancement of this resource. Please feel free to open an issue in the repository or reach out directly via email (chenle020gmail.com) for any such matters. We aim to address all feedback promptly.

1.5 Acknowledgments

We hope that the resources compiled in this bibliography bank have been supportive in your research endeavors. We are sincerely grateful for any form of acknowledgment you might extend. Should you wish to mention this work, a statement such as the one below could be included in your acknowledgments section or as a footnote:

The author(s) would like to recognize the contribution of the GitHub repository chenle02/SPDEs-Bib curated by Le Chen, which has supported this research.

Or, if you prefer to directly cite this repository, please feel free to use the following BibTeX entry:

Books

aaronson:97:introduction

Aaronson, Jon (1997). An introduction to infinite ergodic theory. Vol. 50. Mathematical Surveys and Monographs. American Mathematical Society, Providence, RI, pp. xii+284. ISBN: 0-8218-0494-4. DOI: 10.1090/surv/050. URL: https://doi.org/10.1090/surv/050.

ablowitz.fokas:03:complex

Ablowitz, Mark J. and Athanassios S. Fokas (2003). Complex variables: introduction and applications. Second. Cambridge Texts in Applied Mathematics. Cambridge University Press, Cambridge, pp. xii+647. ISBN: 0-521-53429-1. DOI: 10.1017/CB09780511791246. URL: https://doi.org/10.1017/CB09780511791246.

abramowitz:65:handbook

Abramowitz, Milton (1965). Handbook of mathematical functions, with formulas, graphs, and mathematical tables. National Bureau of Standards Applied Mathematics Series, No. 55. Superintendent of Documents. U. S. Government Printing Office, Washington, D.C., pp. xiv+1046.

abramowitz.stegun:64:handbook

Abramowitz, Milton and Irene A. Stegun (1964). Handbook of mathematical functions with formulas, graphs, and mathematical tables. National Bureau of Standards Applied Mathematics Series, No. 55. For sale by the Superintendent of Documents. U. S. Government Printing Office, Washington, D.C., pp. xiv+1046.

adams.hedberg:96:function

Adams, David R. and Lars Inge Hedberg (1996). Function spaces and potential theory. Vol. 314. Grundlehren der mathematischen Wissenschaften [Fundamental Principles of Mathematical Sciences]. Springer-Verlag, Berlin, pp. xii+366. ISBN: 3-540-57060-8. DOI: 10.1007/978-3-662-03282-4. URL: https://doi.org/10.1007/978-3-662-03282-4.

adams:75:sobolev

Adams, Robert A. (1975). Sobolev spaces. Pure and Applied Mathematics, Vol. 65. Academic Press [Harcourt Brace Jovanovich, Publishers], New York-London, pp. xviii+268.

adams.fournier:03:sobolev

Adams, Robert A. and John J. F. Fournier (2003). Sobolev spaces. Second. Vol. 140. Pure and Applied Mathematics (Amsterdam). Elsevier/Academic Press, Amsterdam, pp. xiv+305. ISBN: 0-12-044143-8.

adler.taylor.ea:07:applications

Adler, Robert J et al. (2007). Applications of random fields and geometry: Foundations and case studies.

adler:90:introduction

Adler, Robert J. (1990). An introduction to continuity, extrema, and related topics for general Gaussian processes. Vol. 12. Institute of Mathematical Statistics Lecture Notes—Monograph Series. Institute of Mathematical Statistics, Hayward, CA, pp. x+160. ISBN: 0-940600-17-X.

adler.taylor:07:random

Adler, Robert J. and Jonathan E. Taylor (2007). Random fields and geometry. Springer Monographs in Mathematics. Springer, New York, pp. xviii+448. ISBN: 978-0-387-48112-8.

wal.lakshmikantham:93:uniqueness

Agarwal, R. P. and V. Lakshmikantham (1993). Uniqueness and nonuniqueness criteria for ordinary differential equations. Vol. 6. Series in Real Analysis. World Scientific Publishing Co., Inc., River Edge, NJ, pp. xii+312. ISBN: 981-02-1357-3. DOI: 10.1142/1988. URL: https://doi.org/10.1142/1988.

agmon:65:lectures

Agmon, Shmuel (1965). Lectures on elliptic boundary value problems. Van Nostrand Mathematical Studies, No. 2. Prepared for publication by B. Frank Jones, Jr. with the assistance of George W. Batten, Jr. D. Van Nostrand Co., Inc., Princeton, N.J.-Toronto-London, pp. v+291.

ahlfors:78:complex

Ahlfors, Lars V. (1978). *Complex analysis*. Third. International Series in Pure and Applied Mathematics. An introduction to the theory of analytic functions of one complex variable. McGraw-Hill Book Co., New York, pp. xi+331. ISBN: 0-07-000657-1.

aizenman.warzel:15:random

Aizenman, Michael and Simone Warzel (2015). Random operators. Vol. 168. Graduate Studies in Mathematics. Disorder effects on quantum spectra and dynamics. American Mathematical Society, Providence, RI, pp. xiv+326. ISBN: 978-1-4704-1913-4. DOI: 10.1090/gsm/168. URL: https://doi.org/10.1090/gsm/168.

akemann.baik.ea:11:oxford

Akemann, Gernot, Jinho Baik, and Philippe Di Francesco (2011). *The Oxford handbook of random matrix theory*. Oxford University Press, Oxford, pp. xxxii+919. ISBN: 978-0-19-957400-1.

lbeverio.gesztesy.ea:05:solvable

Albeverio, S., F. Gesztesy, et al. (2005). Solvable models in quantum mechanics. Second. With an appendix by Pavel Exner. AMS Chelsea Publishing, Providence, RI, pp. xiv+488. ISBN: 0-8218-3624-2. DOI: 10.1090/chel/350. URL: https://doi.org/10.1090/chel/350.

n.seppalainen.ea:18:introduction

Anderson, David F., Timo Seppäläinen, and Benedek Valkó (2018). *Introduction to probability*. Cambridge Mathematical Textbooks. Cambridge University Press, Cambridge, pp. xv+429. ISBN: 978-1-108-41585-9.

rson.guionnet.ea:10:introduction

Anderson, Greg W., Alice Guionnet, and Ofer Zeitouni (2010). An introduction to random matrices. Vol. 118. Cambridge Studies in Advanced Mathematics. Cambridge University Press, Cambridge, pp. xiv+492. ISBN: 978-0-521-19452-5.

apostol:76:introduction

Apostol, Tom M. (1976). *Introduction to analytic number theory*. Undergraduate Texts in Mathematics. Springer-Verlag, New York-Heidelberg, pp. xii+338.

applebaum:04:levy

Applebaum, David (2004). Lévy processes and stochastic calculus. Vol. 93. Cambridge Studies in Advanced Mathematics. Cambridge University Press, Cambridge, pp. xxiv+384. ISBN: 0-521-83263-2. DOI: 10.1017/CB09780511755323. URL: https://doi.org/10.1017/CB09780511755323.

arendt.batty.ea:01:vector-valued

Arendt, Wolfgang et al. (2001). Vector-valued Laplace transforms and Cauchy problems. Vol. 96. Monographs in Mathematics. Birkhäuser Verlag, Basel, pp. xii+523. ISBN: 3-7643-6549-8. DOI: 10.1007/978-3-0348-5075-9. URL: https://doi.org/10.1007/978-3-0348-5075-9.

arnold:98:random

Arnold, Ludwig (1998). Random dynamical systems. Springer Monographs in Mathematics. Springer-Verlag, Berlin, pp. xvi+586. ISBN: 3-540-63758-3. DOI: 10.1007/978-3-662-12878-7. URL: https://doi.org/10.1007/978-3-662-12878-7.

asmussen.glynn:07:stochastic

Asmussen, Søren and Peter W. Glynn (2007). Stochastic simulation: algorithms and analysis. Vol. 57. Stochastic Modelling and Applied Probability. Springer, New York, pp. xiv+476. ISBN: 978-0-387-30679-7.

assing.schmidt:98:continuous

Assing, Sigurd and Wolfgang M. Schmidt (1998). Continuous strong Markov processes in dimension one. Vol. 1688. Lecture Notes in Mathematics. A stochastic calculus approach. Springer-Verlag, Berlin, pp. xii+137.

ISBN: 3-540-64465-2. DOI: 10.1007/BFb0096151. URL: https://doi.org/10.1007/BFb0096151.

bahouri.chemin.ea:11:fourier

Bahouri, Hajer, Jean-Yves Chemin, and Raphaël Danchin (2011). Fourier analysis and nonlinear partial differential equations. Vol. 343. Grundlehren der mathematischen Wissenschaften [Fundamental Principles of Mathematical Sciences]. Springer, Heidelberg, pp. xvi+523. ISBN: 978-3-642-16829-1. DOI: 10.1007/978-3-642-16830-7. URL: https://doi.org/10.1007/978-3-642-16830-7.

bain.crisan:09:fundamentals

Bain, Alan and Dan Crisan (2009). Fundamentals of stochastic filtering. Vol. 60. Stochastic Modelling and Applied Probability. Springer, New York, pp. xiv+390. ISBN: 978-0-387-76895-3. DOI: 10.1007/978-0-387-76896-0. URL: https://doi.org/10.1007/978-0-387-76896-0.

balan:01:set-markov

Balan, Raluca M. (2001). Set-Markov processes. Thesis (Ph.D.)—University of Ottawa (Canada). ProQuest LLC, Ann Arbor, MI, p. 198. ISBN: 978-0612-66119-6. URL: http://gateway.proquest.com/openurl?url_ver=Z39.88-2004&rft_val_fmt=info:ofi/fmt:kev:mtx:dissertation&res_dat=xri:pqdiss&rft_dat=xri:pqdiss:NQ66119.

barabasi.stanley:95:fractal

Barabási, Albert-László and H. Eugene Stanley (1995). Fractal concepts in surface growth. Cambridge University Press, Cambridge, pp. xx+366. ISBN: 0-521-48318-2. DOI: 10.1017/CB09780511599798. URL: https://doi.org/10.1017/CB09780511599798.

barenblatt:96:scaling

Barenblatt, Grigory Isaakovich (1996). Scaling, self-similarity, and intermediate asymptotics. Vol. 14. Cambridge Texts in Applied Mathematics. With a foreword by Ya. B. Zeldovich. Cambridge University Press, Cambridge, pp. xxii+386. ISBN: 0-521-43516-1; 0-521-43522-6. DOI: 10.1017/CB09781107050242. URL: https://doi.org/10.1017/CB09781107050242.

barlow.nualart:98:lectures

Barlow, M. T. and D. Nualart (1998). Lectures on probability theory and statistics. Vol. 1690. Lecture Notes in Mathematics. Lectures from the 25th Saint-Flour Summer School held July 10–26, 1995, Edited by P. Bernard. Springer-Verlag, Berlin, pp. viii+227. ISBN: 3-540-64620-5. DOI: 10.1007/BFb0092536.
